Established in 2010, the mission of PDS is to provide you with training and resources to develop the skills needed to succeed as a current science and engineering researcher and a future professional in a variety of careers. The series helps you develop skills in: communication, academic development (scholarship, teaching & mentorship), and career preparation.

**The Seminars, Workshops and Events**

Cover diverse topics in career exploration and preparation and put you in contact with career professionals for networking opportunities.

Offered as a one-time event or as a mini-series, depending on the topic (e.g., writing about science for the public is a mini-series; career seminars are one-time events).

Designed in a modular format; prior workshop attendance is not a prerequisite for any event.

Offered bi-monthly; 1-2 hours in duration and led by professionals in the field or faculty from various STEM departments.

Advertised by email, RSVPs are collected to ensure adequate resources and classroom space.
